Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election Acknowledgment

1. Acknowledgment is made of the election of group I claims 1-15, with traverse, the non-elected claims, i.e., claims 16-19 are withdrawn from the consideration. The non-elected claims should be canceled by the Application during the prosecution of this application.

2. Figures 1-10, or any other figure in that matter, should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2855

4. Claims 1-5, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Norby et al. (5,756,903)

Regarding claims 1, 4, Norby et al., discloses a track strength testing vehicle with features of the claimed invention including an axle assembly (element 30) having a first wheel and a second wheel (see, for example, figure 6), the wheels positioned to ride on railway track a first and a second axle halves each connected to a wheel. The axle halves being interconnected by a device adapted to increase and decrease the distance between them each axle half. Norby et al., only shows one force detecting means (element 68) and does not show two separate load sensing device for each axle. It would have been obvious, however, for a skilled artisan at the time of the invention to modify Norby et al., to provide for two load sensing means, one for each. Because increasing the number of the sensors and specifically allocating a sensor to each axle obviously aids to increase the accuracy and reliability of the measurement.

Regarding claims 2, and 8, Norby et al., teaches the use of hydraulic ram (see claim 1).

Regarding claim 3, the axles do not rotate.

Regarding claim 5, Norby et al., shows vertical recesses (see for example figure 8).

5. Claims 6, 7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 10-15 are allowed over the prior art of the record.

Art Unit: 2855

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 PM.
